Environmental Management System

Manage EH&S risks and opportunities

Environmental, health and safety issues are a key component of risk management, as well as environmental and social sustainability performance. Organizations from universities to corporations are finding the value of implementing a comprehensive EH&S management system to ensure that they are mitigating shortfalls in environmental compliance, workers safety issues, stakeholder concerns, and more. By way of accountability and continuous measurement, a well develop system will maximize performance. Furthermore, a good EH&S management system will benchmark set goals for constant improvement.

Environmental Management System is an innovative training course that provides a framework for identifying the risks, opportunities and impacts of an organization's operations. This course analyzes key EH&S issues and provides a systems-based approach for managing them in a way that makes sense for any organization. Like any good management system, the framework will guide organizations to:

- EH&S Planning
- Implementation
- Measurement and Assessment
- Managerial Review and Performance Improvement

Entire organizations benefit from a good EH&S management system, increasing profitability through ensured compliance, workers' safety and more.
